

CAMP NAME: _____

Camp USA has always required participants to include a complete medical report with their applications so camps have medical information and history for their international staff members. However, because different camps require different vaccinations, Camp USA has never required our participants to have specific immunizations.

Due to health issues that camps had with international staff a few summers ago, international staffing organizations have decided as an industry to highlight each camp's immunization requirements by including those requirements on all placement offers for our participants. Though we will be unable to force participants to obtain specific immunizations, our intention is to facilitate communication between camps and participants about this particular issue so we can help camps avoid health problems during the summer.

Please fill out this form and return it to us with your other registration materials. If you do not have any immunization requirements, you do not need to return this form. As always, feel free to contact us at 1-800-597-1722 or CampUSA@InterExchange.org with any questions.
